

tesseract_process_managers
/examples/raster_example
_program.h

```
graph BT; A["tesseract_process_managers/examples/raster_manager_example.cpp"] --> C["tesseract_process_managers/examples/raster_example_program.h"]; B["tesseract_process_managers/test/tesseract_process_managers_unit.cpp"] --> C;
```

The diagram illustrates a header file dependency. At the top is a grey-shaded box representing the header file: `tesseract_process_managers/examples/raster_example_program.h`. Below it are two white boxes representing source files. The left box is `tesseract_process_managers/examples/raster_manager_example.cpp` and the right box is `tesseract_process_managers/test/tesseract_process_managers_unit.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include this header.
