

tesseract\_process\_managers  
/include/tesseract\_process  
\_managers/core/debug\_observer.h

```
graph BT; A["tesseract_process_managers  
/src/core/debug_observer.cpp"] --> C["tesseract_process_managers  
/include/tesseract_process  
_managers/core/debug_observer.h"]; B["tesseract_process_managers  
/src/core/process_planning  
_server.cpp"] --> C;
```

The diagram illustrates a header file dependency. At the top is a grey box representing the header file: `tesseract_process_managers/include/tesseract_process_managers/core/debug_observer.h`. Below it are two white boxes representing source files. The left box is `tesseract_process_managers/src/core/debug_observer.cpp` and the right box is `tesseract_process_managers/src/core/process_planning_server.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include this header.
