

tesseract_process_managers
/examples/raster_example
_program.h

```
graph BT; A["tesseract_process_managers/examples/raster_manager_example.cpp"] --> C["tesseract_process_managers/examples/raster_example_program.h"]; B["tesseract_process_managers/test/tesseract_process_managers_unit.cpp"] --> C;
```

This diagram illustrates the relationship between three source files in the Tesseract project. At the top is a header file, `tesseract_process_managers/examples/raster_example_program.h`, which is shaded gray. Below it are two source files: `tesseract_process_managers/examples/raster_manager_example.cpp` on the left and `tesseract_process_managers/test/tesseract_process_managers_unit.cpp` on the right. Blue arrows point from each source file to the header file, indicating that both source files include this header.
