

tesseract_command_language
/include/tesseract_command
_language/serialize.h

```
graph BT; A["tesseract_command_language  
/src/serialize.cpp"] --> B["tesseract_command_language  
/include/tesseract_command  
_language/serialize.h"]; C["tesseract_command_language  
/test/serialize_test.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: `tesseract_command_language/include/tesseract_command_language/serialize.h`. Below it are two white boxes representing source files. The left box is `tesseract_command_language/src/serialize.cpp` and the right box is `tesseract_command_language/test/serialize_test.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header file.

tesseract_command_language
/src/serialize.cpp
