

tesseract\_command\_language  
/include/tesseract\_command  
\_language/deserialize.h

```
graph BT; A["tesseract_command_language  
/src/deserialize.cpp"] --> C["tesseract_command_language  
/include/tesseract_command  
_language/deserialize.h"]; B["tesseract_command_language  
/test/serialize_test.cpp"] --> C;
```

The diagram illustrates a header file dependency. At the top, a gray-shaded box represents the header file: `tesseract_command_language/include/tesseract_command_language/deserialize.h`. Below it, two white boxes represent source files. The left box is `tesseract_command_language/src/deserialize.cpp` and the right box is `tesseract_command_language/test/serialize_test.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include this header.

tesseract\_command\_language  
/src/deserialize.cpp
