

tesseract\_planning  
::TaskGenerator

```
graph BT; A[tesseract_planning::MotionPlannerTaskGenerator] --> B[tesseract_planning::TaskGenerator];
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray-shaded box representing the base class, `tesseract_planning::MotionPlannerTaskGenerator`. A blue arrow points vertically upwards from this box to a white box above it, representing the derived class, `tesseract_planning::TaskGenerator`. This indicates that `MotionPlannerTaskGenerator` inherits from `TaskGenerator`.
