

tesseract\_process\_managers  
/examples/raster\_example  
\_program.h

```
graph BT; A["tesseract_process_managers/examples/raster_manager_example.cpp"] --> C["tesseract_process_managers/examples/raster_example_program.h"]; B["tesseract_process_managers/test/tesseract_process_managers_unit.cpp"] --> C;
```

This diagram illustrates the relationship between three source files. At the top is a header file, 'tesseract\_process\_managers/examples/raster\_example\_program.h', which is shaded gray. Below it are two source files: 'tesseract\_process\_managers/examples/raster\_manager\_example.cpp' on the left and 'tesseract\_process\_managers/test/tesseract\_process\_managers\_unit.cpp' on the right. Both source files have blue arrows pointing upwards to the header file, indicating that they include it.
